Product Components Introduction

01

Made from high-quality materials, the parts are durable and resistant to wear, ensuring a long service life.

02

Copper core motor, guaranteed quality, and stable performance.

03

The upgraded alloy grinding chamber is made of chromium-manganese, processed through high-temperature quenching, making it wear-resistant and durable.

04

Efficient rotation, wear-resistant, self-adjusting balance, low noise, and low energy consumption operation enhance work efficiency.

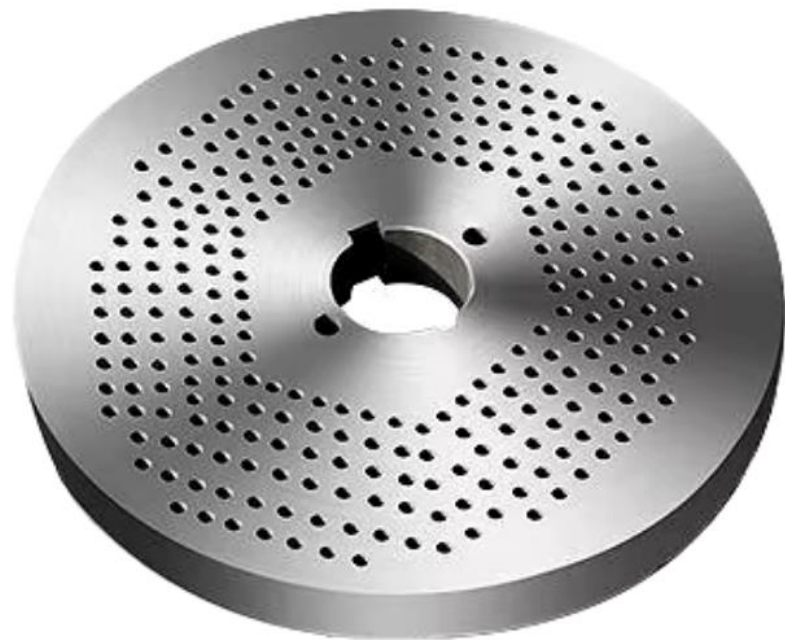

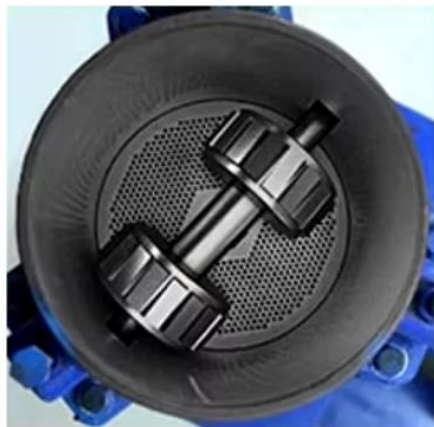

05

Automotive-style rear axle differential is durable, stable, and operates with low noise.

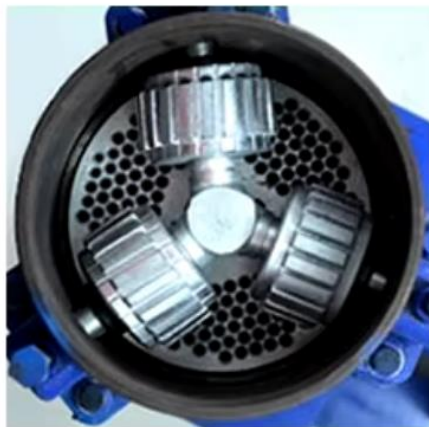

06

The upgraded alloy grinding chamber is made of chromium-manganese, processed through high-temperature quenching, making it wear-resistant and durable.
